EXPERIENCE

Data Annotator

2020 - 2025

Remotask

- Annotated complex 3D LiDAR datasets, segmenting and classifying vehicles, pedestrians, and traffic signals to support AI model training across multiple project engagements.

Web Developer

March - December 2025

USTP - Registrar

- Engineered the frontend for an automated digital document request system, streamlining student-registrar workflows and improving request accessibility.

Software Engineer - Startup Incubation Program

June - August 2026

Center for Entrepreneurship and Technology - USTP

- Engineered an AI-powered live call coaching platform, delivering real-time reply suggestions and post-call communication analytics to optimize Virtual Assistant performance. A development of a scalable SaaS product through a university startup incubation program.

PROJECTS

HusAI

<https://github.com/Birky-andrie/HusAI>

React, Typescript, NodeJS, Supabase

- Developed an AI-powered live call coaching platform that delivers real-time assistance and post-call analytics to improve Virtual Assistant communication.

IRequest

<https://github.com/pendonj14/iRequest>

React, Javascript, Django

- Developed the frontend for a university document request system integrating with a Django backend API to streamline registrar operations and improve student accessibility.

Automated Leads Enrichment

Zapier, Apollo, Slack, Google Sheets, Gmail

- Automated a financial reporting pipeline that synchronizes accounting data into task management workflows, eliminating manual entry errors and accelerating reporting turnaround.

Automated Financial Reporting

Make, Xero, Asana, Google Sheets

- Automated a financial reporting pipeline that synchronizes accounting data into task management workflows, eliminating manual entry errors and accelerating reporting turnaround.

Automated Lead Capture & AI Classification

n8n, Jotform, Google Sheets, Google Gemini, Gmail, Slack

- Built a lead automation pipeline that captures, deduplicates, and AI-classifies inbound leads in real time, delivering Slack notifications with priority scoring to accelerate sales response.

Dental Clinic Lead Generation & Booking System

GoHighLevel (GHL), CRM, Workflows, Landing Pages, Forms, Calendars, Pipeline Automation

- Built conversion-focused landing pages and automated lead-to-booking workflows, connecting forms, calendars, CRM pipelines, and follow-ups to streamline lead management and appointment scheduling.

EDUCATION

University of Science and Technology of Southern Philippines

2023 - Present

B.S Computer Science
