EXPERIENCE

Data Annotator

2020 - 2025

Remotask

- * Precisely annotated complex 3D LiDAR datasets, segmenting and classifying diverse objects including vehicles, pedestrians, and traffic signals for AI training.
- * Worked across multiple engagements (Jun–Dec 2020, May–Sep 2024, Nov–Dec 2025).

Web Developer

March - December 2025

USTP - Registrar

- * Engineered the frontend for an automated digital system, optimizing the process for student document requests.

PROJECTS

PollView

<https://github.com/ken122704/PollView>

Next.js, React, TypeScript, Supabase

- * Designed and developed a real-time polling system using Next.js, React, TypeScript, and Supabase to handle concurrent user voting, enabling synchronized data updates across clients and delivering instant feedback visualization with zero-latency response for live audience engagement.

ResuMake

<https://github.com/ken122704/ResuMake>

Next.js, React, Typescript, Supabase

- * Engineered an AI-powered resume optimization platform using Next.js, React, TypeScript, Supabase, and Gemini AI to generate ATS-friendly bullet points, streamlining resume creation workflows and reducing formatting time from hours to minutes while improving job application effectiveness.

IRequest

<https://github.com/pendonj14/iRequest>

React, Javascript, Django

- * Developed the frontend interface for a document request management system using React and JavaScript, integrating with a Django backend API to streamline user interactions and improve document request accessibility for university registrar operations.

AI Voice Receptionist

n8n, Google Calendar, Airtable, VAPI

- * Developed an AI-powered voice agent that handles inbound and outbound calls, automating 24/7 reception workflows and ensuring continuous lead capture while reducing staffing dependency.

Automated Leads Enrichment

Zapier, Apollo, Slack, Google Sheets, Gmail

- * Engineered an end-to-end lead automation system that captures, enriches, and prioritizes sales prospects, improving routing speed and enabling immediate engagement with high-value leads.

Automated Financial Reporting

Make, Xero, Asana, Google Sheets

- * Built a financial automation pipeline that synchronizes accounting data directly into task management systems, eliminating manual entry errors and accelerating reporting workflows.

EDUCATION

University of Science and Technology of Southern Philippines

2023 - Present

B.S Computer Science

SKILLS

HTML, CSS, JavaScript, Python, TypeScript, React, Firebase, Supabase, Node.js, Zapier, Make, n8n, GoHighLevel
